

CONCORDE

Breeder

East Malling Research (EMR) - UK

The Tree

- TREE TYPE: Similar tree as Conference
- VIGOR: Medium vigor, slightly less than Conference
- PRODUCTIVITY: Better than Conference
- BLOOMING TIME: between Williams and Doyenné du Comice.
- HARVEST DATE: Similar to Comice
- BI-ANNUAL BEARING: Low susceptibility
- TOLERANCE TO PESTS & DISEASES: resistant to folletage, low susceptibility to pear decline and fireblight

The Fruit

Presentation: "Pear shaped, similar to Conference with more consistency. Green-yellow fruit, very similar to Conference with a light colour (less russetting)"

Eating Quality: "Rather crispy and good sugar level. Eating quality close to Comice"

Storage Ability: "Until February at -1°C. Very good resistance to bruising"

Highlight

"Concorde has the look of Conference with the taste of Comice. Very interesting for southern countries due to its resistance to folletage."
