

Suntan

The Tree

- TREE TYPE: Open tree
- VIGOR: Strong
- PRODUCTIVITY: Good
- BLOOMING TIME: Late (5 days after Golden Delicious)
- HARVEST DATE: 10 to 15 days before Golden Delicious
- BI-ANNUAL BEARING: Medium susceptibility
- TOLERANCE TO PESTS & DISEASES: Very resistant to scab, possible susceptibility to mildew

The Fruit

Presentation: "Orange-red skin with russet"

Eating Quality: "Flesh crisp to tender. The taste is acidic with very good flavors."

Storage Ability: "4 to 5 months in cold storage."

Highlight

"Suntan is suitable for organic orchard but not in warm climates as the fruits are susceptible to sunburn and the flesh can become floury. Suntan is a triploid variety, thus it cannot be used as a pollinator"
